SINCLAIR QL

A full size computer designed around the most powerful and advanced microprocessor yet created for the personal computer, the MOTOROLA 68008.

128K of RAM, expandable to 640K, two built-in micro-drives, networking, a full size QWERTY keyboard, and its own operating system QDOS - - accomodates windows and even multitasking! The QL offers high resolution color or black and white display on either TV or monitor. It has a reset button, 2 RS232 ports, 2 Joystick ports, 2 LAN ports, ROM Cartridge port, Expansion port, Microdrive extension slot for up to 6 extra microdrives. Expansion slot can be used for additional memory (max 640K), and/or disk drive I/F.

That's just the hardware. The QL also comes complete with all the software you need to get started right away doing useful work.

QL QUILL-wordprocessor QL ARCHIVES-database
QL ABACUS-spreadsheet
QL EASEL-business graphics

These 4 programs are professionally written and fully integrated. They are extremely powerful and easy to use.

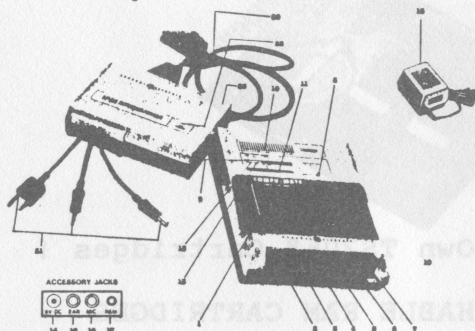

Additionally beginning 2/1/86 with your 1st purchase of a QL from us we will include, your choice, of any one of the 19 listed titles below:

QL MON/DISA	CARTRIDGE DOCTOR	COSMOS
QL TOOLKIT	WD UTILITIES	WEST
QL CHESS	SPACE PARANOIDS	QSPELL
QL CAVERNS	PAINT MASTER	
QL TOUCH-N-GO	BLAST BUGGY	
QL HOME FINANCE	AREA RADAR CONTROLLER	
QL GARDENER	QUAZIMODO	
GALACTIC INVADERS	& STAR GUARD	SB EXTRAS

32K RAM PACKS!

Make Your Own TS2068 Cartridges !

BANK SWITCHABLE RAM CARTRIDGES

Battery Powered to Retain Memory !

Lithium power cells (estimated battery life several yrs) retain your programs even when removed from the dock bank! Each cartridge has 32K RAM, AND, is switch assignable to either dock bank - cartridge slot, or EXROM bank! This means you could even develop your own operating system. Switch it to 'PROTECT', and your cartridge cannot be erased or modified, or, switch to 'WRITE', and your data can be altered. Extensive documentation is included - enough even for machine code enthusiasts - and at the same time, it's simple enough even for experienced BASIC language programmers. Whether you just want the versatility offered by additional RAM or to develop your own cartridge software these high quality cartridges are the answer we've been waiting for! Order Today!

SPEECH SYNTHESIZER

SS68 Speech Synthesizer for the TS2068! Consists of nine programs including 273 high quality digitized words in variable length cells. Words can be played back in any order under program control. Each library of words contains 70 to 80 words or phrases. Sound is heard through the TS2068's internal speaker and is also available at the MIC jack. Requires no additional hardware or software to operate. Programs written by you using words created with the use of this program, may be sold. A real value packed program that will provide hours of fun and entertainment. Impress your friends with SS68.

CATALOG #1130

\$16.95

SPEECH HARDWARE

HS68 Hardware/Software package for the creation of word libraries. Includes everything necessary to create custom vocabularies for any application. A spoken word is digitized and stored in memory automatically. Allows for an unlimited vocabulary. Another very nice, very useful feature, is that HS68 allows you to digitize other sounds as well as special effects! Now, you can experiment with speech recognition or verification. The hardware includes a hand-held unit (about 2"x3") with a built in mic. The unit simply plugs into the ear plug of the 2068, powered by a 9V battery (incl).

OS 64

THE 64 COLUMN OPERATING SYSTEM CARTRIDGE FOR THE TIMEX 2068 COMPUTER

Simply plug in the OS64 cartridge into the Timex's cartridge port and transform your 32 column computer into the 64 column computer you've been dreaming about.

OS-64 is an advanced 64-column operating system which is fully compatible with the 32 column mode commands and functions. You will now be able to write and edit programs in a 64 column environment which allows you twice as much program or text on the screen as the standard 32 column mode. No special commands to learn, you use the same PRINT, LIST, and EDIT commands that you now use.

Not only will you see 64 columns on your screen, but all LPRINTS and LLISTS to your 2040 printer will be in 64 columns as well. AND, if that isn't enough, if you have a Centronics type interface such as AERCO, TASMAN, OLIGER, OR A&J, you can take advantage of the BUILT-IN 80-column printer drivers....! No need to load up a driver program with OS-64! NOTE: COPY will dump to EPSON compatible printers only. OS-64 comes on cartridge, and is not effected by NEW or CLEAR.

OUR POLICY REGARDING SOFTWARE SALES

ALL SOFTWARE THAT WE SELL IS GUARANTEED TO LOAD. ANY SOFTWARE THAT DOES NOT LOAD MAY BE RETURNED FOR REPAIR (OR REPLACEMENT AT OUR OPTION). SOFTWARE THAT IS RETURNED MAY ONLY BE REPLACED BY SOFTWARE OF THE SAME TITLE. WE DO NOT WARRANT THAT ANY PARTICULAR SOFTWARE WILL EXACTLY MEET YOUR PARTICULAR NEEDS, OR REQUIREMENTS.

TECH-DRAW JR

Inspired by MacPaint on the Apple Macintosh, this new program brings startling graphic capabilities to your TS2068. Tech-Draw Jr. is designed for use with any Atari compatible joystick. Like the Macintosh, it uses shades and patterns of black and white to create graphic images. You can select brush shape and size, draw circles, horizontal and vertical lines, multiple lines and even FILL your designs with preset patterns. If you make a mistake, there's an UNDO command. There's even a text mode that gives you several new sizes and styles of type in bold, italic, and standard modes. Once you've designed an image, you can use it in your own programs with SCREEN\$ commands. You can use Tech-Draw Jr. to edit SCREEN\$ from other programs.

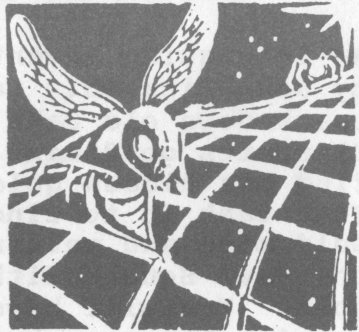

All in all, you get 35 preset shades and patterns and 16 selectable brushes. Your work can be printed on your 2040 printer or on full size printers through the AERCO, TASMAN B, AND A&J printer interfaces. It'll SAVE onto the A&J Microdrives also. Printers it specifically supports include, EPSON FX/RX, Gemini 10X, Star SG10, Memotech DMX80, Panasonic 1090/1091, Spirit 80, Seikosha 250/100, Gorilla Banana, Prowriter 8510, and Legend 880/808. Please note, you need a joystick to make optimum use of Tech Draw Jr. Here's a program that turns your 2068 into a super graphics computer. Order your copy of Tech-Draw today!

CATALOG # 1105

\$19.95

TRAXX

Fast action! Capture squares for points, if you can capture all 4 corners of the grid, you'll have only 10 seconds to eat the bugs (the pursuers). 9 speeds to choose from and up to 9 pursuers. High speed action graphics-joystick control. 1 or 2 players.

CATALOG #1081

\$15.95

AQUAPLANE

An unbelievable action packed game for waterskiers and non waterskiers that you will love. Ski around rocks and through Marine Maniacs. Many hazards to avoid like speed boats, Great White Hungrys, and Regattas. Truly a challenge for all.

CATALOG #1078

\$15.95

THE SNOWMAN

Build a snowman by collecting bits of snow thus amassing points. You must avoid the flame, pick flashing objects to get extra points, and watch out for Sleep Monsters who do not pick the best of times to put you asleep. Don't fall off the ledges either. Fun for all ages. Joystick control.

RAYMOND BRIGGS

CATALOG #1077

\$15.95

The GREETING CARD DESIGNER for the TS2068 can be used to print custom greeting cards for any occasion including: Birthdays, Christmas, Anniversaries, Mother's Day, Valentine's Day, Custom Invitations, Thank-You cards, Get-Well Cards, Announcements, or just about anything else this type of format can be used for!

The GREETING CARD DESIGNER is easy to use and includes a library of Pre-Drawn Hi-Res Graphic Pictures for most holidays such as a Christmas Tree, Birthday Cake, Turkey, Wreath, Graduate, Gift Box and others. You can also design your own library of Graphic images to create just about any theme greeting card. Included are 8 decorative borders which you can use to decorate your cards.

You can write custom messages on the cover and inside your cards in a selection of character fonts and sizes. An easy to use screen editor allows you to pick your type style, font size, and select Flush left, Flush Right, or Centered Text.

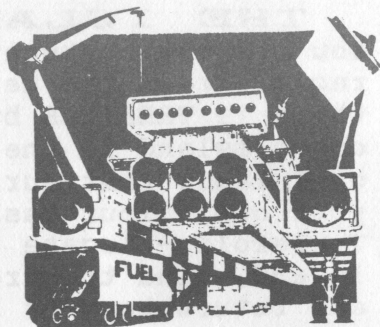

The GREETING CARD DESIGNER is compatible with the AERCO, TASMAN, OLIGER or A&J C/P I/F's and works well with the following 80-column printers: EPSON MX-80, RX-80, FX-80; STAR 10X and SG-10, MEMOTECH DMX-80, LEGEND 880, PANASONIC 1090/1091, CITH 8510, SEIKOSHA GP-250, GORILLA BANANA.

THE HANDICAPPERS

Use your TS2068 to improve your performance at the track! These fine programs for THOROUGHBREDS, HARNESS HORSES, and GREYHOUNDS combine the power of your TS2068 computer with the savvy of a veteran handicapper. Spend a few minutes entering data, and The Handicapper will rank the horses or dogs in each race. All the information is readily available from the Thoroughbred Racing form, Harness, or Greyhound Track Program. We even provide a diagram showing you where to get the data you need!

Horse racing factors include speed, class, past performance, post position, stretch gain, beaten favorite, jockey or drivers record, weight (for thoroughbreds) and parked out signs (for trotters). Greyhound factors include speed, past performance, class, favorite box, kennel record, breaking tendencies, and beaten favorite.

Complete instructions and wagering guide included.

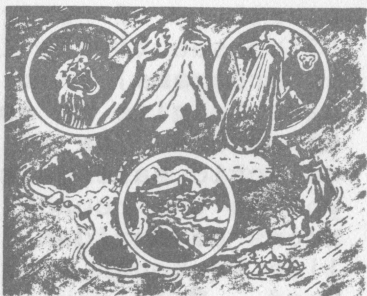

THOROUGHBRED HANDICAPPER	#1113	\$16.95
HARNESS HANDICAPPER	#1111	16.95

STARFIRE

A game of strategy and skill. You are the Commander of the only remaining EARTH SPACE AGENCY ship in the entire galaxy. The rest of your fleet has been wiped out by a powerful alien force, leaving you to navigate the entire galaxy and destroy the alien fighters SINGLE HANDED! Ten levels of play.

CATALOG # 1085

\$15.95

BUGABOO

No fleas in this program! Bugaboo the flea is trapped in the caves. Help him jump around the narrow ledges and exotic vegetation to safety-avoiding the fearsome Pterodactyl, but watch out for those Venus Fly Traps! Joystick or keyboard control - Great graphics - machine code!

CATALOG # 1073

\$15.95

ZIP BASIC COMPILER

Zip is an aid for experienced BASIC programmers. It allows you to write a program in BASIC, and then compile that program into SUPER FAST MACHINE CODE. Typically, a ZIP compiled program will run 100 times faster than the same BASIC program! ZIP checks your BASIC program for any errors before it compiles. After ZIP has compiled your program, it will give you the address where the code is located, and the number of bytes ZIP used for your program (much less than what BASIC uses). You'll then only need a short "leader" program that will load your saved code and call the machine language routine (i.e. PRINT USR 12345). Zip, like any other compiler for the 2068, does not support all the TS2068 commands (because of the memory limitations of our 2068), and does not support string handling.

Zip has an OPTIMIZATION mode, that produces especially FAST machine code for your compiled program. Zip also includes a great Demo Game in BASIC that you can compile so that you may experience the true power of this compiler. The following is a list of the 2068 keywords that ZIP can compile.

ABS	AND	AT	ATTR	BIN	BORDER	BRIGHT
CHR\$	CLEAR	CLS	DIM	DRAW	FLASH	FOR
GO TO	IF	IN	INK	INPUT	INT	INVERSE
LET	NEXT	NOT	OR	OUT	OVER	PAPER
PAUSE	PEEK	PLOT	PRINT	POKE	REM	
RETURN	RANDOMIZE	SGN	STEP	STOP	TAB	
THEN	TO	USR				

In the interests of speed and simplicity, some BASIC words aren't recognised by ZIP. The remainder is still enough to write almost any program, given sufficient effort - and well worth the effort once ZIP has compiled it for you! GIVE ZIP A TRY - YOU'LL BE GLAD YOU DID !!

TRASHMAN

An exciting (Joystick control game that features superb hi-res graphics. A Hit in the UK - an now has been converted to run on the TS2068, Trashman will do well here in the U.S. You play the part of a Trashman just trying to make a living by emptying the trashcans put out by the city residents. They must be picked up, emptied into the garbage truck as it slowly moves down the street (stopping briefly in front of each house as it goes). You have a time limit of course, but you can get extra time for doing the little "extras" that housewives may ask of you - sound easy? Give TRASHMAN a try - oh yes, watch out for the dogs - if you happen to step on the lawn (other surprises!)

CATALOG # 1128 \$15.95

TRAVELS W/TRASHMAN

Sequel to the above. Your mission is to go forth into the world and collect all the trash. Quite a few places can be visited (if your good enough to make the cash needed to travel there); Germany, Hong Kong, France, Spain, Sanoa, Isreal, and of course good ole U.S.A. Lots of action and good graphics - challenging and every bit as good as TRASHMAN. Joystick (or keyboard if you prefer) control.

CATALOG # 1129 \$15.95

TS2068 BASIC TOOLKIT

Written in machine language expressly for those of you programming in BASIC on the TS2068. Toolkit provides 5 useful functions:

- renumbers a program beginning at any line number, using any initial line number, in any step up to 9999. Renumbers explicit line references of: GOTO, GOSUB, LIST, LLIST, RUN, RESTORE, AND SAVE "...." LINE. Also works with VAL references, e.g., GOTO VAL "1500".
- Lists current values of all BASIC variables; numeric and string arrays, and loop control variables.
- Finds any string of characters
- Replaces any string, in every line in which it is found, by any other string.
- Deletes all lines beginning with REM. Helps conserve memory and load time.

CATALOG #1107

\$13.95

ZEAL DISASSEMBLER

A full-featured machine language disassembler for your 2068. Zeal provides a unique combination of features supporting debugging and documentation of your own code and study of the TS2068 ROM:

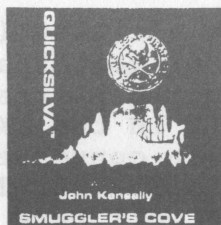

- Machine code routines for fast listings to screen/printer
- Zilog mnemonics; labeling of system variables; decimal addresses.
- Choice of disassembly modes-normal instruction mode plus byte (DEF8) mode and word mode (DEFW) mode.
- Resolution of relative jump addresses (for JR's and DJNZ's) to absolute addresses.
- Disassembly relocation-allows code not in it's normal location to be documented as if it were.
- ROM bank-switching disassembly of the Ext. ROM supported
- Identification of data bytes following RST08's & RST40's
- Cross-reference listings of all JP's and CALL's.

CATALOG #1106

\$13.95

SMUGGLERS COVE

A historical pirate adventure with text and high-resolution graphics and features twenty-seven locations, sixty-five objects, and three levels of escape. The object of the adventure is to escape from the cove with the maximum points by using the best route while overcoming vicious pirates and deadly sea monsters. This game has been known to keep its addicts up all night!

CATALOG #1041

\$13.95

THE CHESSPLAYER

Can you beat this talking chess fanatic? On all 6 levels of play--while ignoring his facetious comments! Choice of White or Black pieces, level of play. You can even change sides in the middle of play. Print out all previous moves onto screen or TS2040 printer. Copy the screen (board layout) to a TS2040 printer. Set up and analyze board positions. All standard chess rules are implemented - including castling and en-passant moves.

CHESSPLAYER A GOOD OPPONENT!

A monster of an unbeatable game! A "STATE OF THE ART" program! Truly enjoyable for the intellectual types, a battle of nerves, and wits.

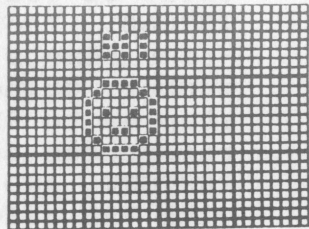

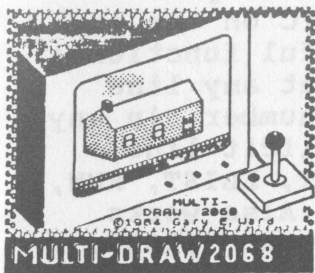

A pure machine code version of 3D tic-tac-toe.

CATALOG #1042

\$13.95

MULTI-DRAW 2068

This is the one! Simply stated, "one of the best screen drawing and graphics program available." This program allows you to draw on the screen with only the use of the joystick! Turn on/off any pixel(s) at will, instantly MAGNIFY the area on the screen that you're working on (for ease on the eyes), and when you're finished with your masterpiece, you can either do a screen copy to a 2040 printer, or a full size dot matrix printer using either the AERCO or TASMAN I/F.

(Printer must, of course, have graphics capabilities). Instructions are provided for different printers. Documentation of this program goes into great detail for those that are interested or may need the information. Screens can be saved, revised, and re-saved easily. Output to a full size printer can be your choice of SMALL PRINT, BIG PRINT, or GRAY PRINT. Gray print is useful if you've used several colors and want different tones of gray print according to the colors used. Program is easily saved after modification, and can be merged with your BASIC program if you desire (for designing game background screens). There are 28 pre-defined graphic characters that can quickly and easily be re-defined using only the joystick-then place them at any screen position.

CATALOG #1021

\$15.95

AERCO C/P I/F

The AERCO Centronics Printer Interface supports most Centronics compatible printers. It supports LLIST, LPRINT, and COPY. Many programs are directly compatible or can be made compatible very easily. All cables and software are included.

CATALOG # 1032 \$54.95

STAR SG-10 PRINTER

The STAR MICRONICS SG-10 printer is a Centronics compatible printer which prints bi-directionally in 80 columns at 120 CPS. Using advanced logic seeking it prints over 30% faster than other 120 CPS rated printers. Its 9X9 Dot matrix produces print-outs of exceptional quality, and it's 30 CPS Near Letter Quality (NLQ) mode makes it an exceptional value. You can use either single sheet plain paper or tractor feed paper (the SG-10 has a built-in tractor feed), or roll paper. Many features such as expanded and compressed print, superscript and subscript, selectable type styles, and dot addressable graphics make this an super value. ADD \$7.50 for Shipping and Handling!

OMNICALC 2

Finally, a spreadsheet analysis program designed to make full use of the TS2068 Computer. It gives you access to a grid of numbers which can be up to 99 columns across or 250 rows deep. All the math functions of the 2068 can be used, making it easy to build up sophisticated models for financial, engineering and many other applications. You can even set up conditional expressions, so that things such as tax, differential interest rates, and variable overheads can be easily accommodated. This spreadsheet can also be used with full size printers using either the AERCO, TASMAN, or A&J C/P Interfaces.

MACHINE CODE TUTOR

It's Here! The TS2068 version of the famous Machine Code Tutor by Malcolm Evans! How long have you been putting it off --- learning machine code? Have you bought books that only tended to confuse you? Give this program your "All American Try"! Written by a professional educator, you'll find that the author has very painstakingly presented the material to be learned in a systematic learning sequence. LEARN AT YOUR OWN PACE - FROM A PROFESSIONAL! Machine Code Tutor consists of 33 lessons on two cassettes (loaded in four parts as you progress). The instructions include actual examples to enable anyone with some knowledge of BASIC (it helps) to learn machine code quickly and easily. The system includes a simulated assembler that will help you spot errors without actually crashing the program. All registers in the Z80 are fully covered for your TS2068. The manual that comes with Machine Code Tutor also is formatted along the lines of the programs on the tapes.

NIGHT GUNNER

NOW AVAILABLE FOR THE TS2068 -

Here's a real ACTION-PACKED arcade style game based on a Second World War scenario. You are the GUNNER and BOMB AIMER (moving and still targets) in 30 thrilling different missions. The rewards are high for the expert marksman - and the going gets tougher with each mission (your aircraft gets fired upon also!). One or two player game - use either joystick or keyboard, and up to four levels of play. HIGH SPEED SUPERB GRAPHICS have made this a favorite in the UK. Good sound effects. From the folks that brought you Fighter Pilot.

FIGHTER PILOT

***** JOYSTICK AND KEYBOARD CONTROLLED *****

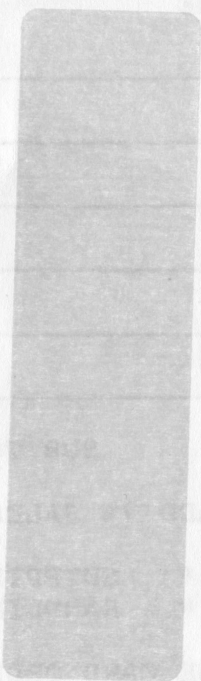

FIGHTER PILOT is a REAL-TIME flight simulation based upon the F15 Eagle, USAF air superiority jet fighter. This supreme simulation offers many of the features found on modern flight simulators including a 3-D view from the cockpit, fully aerobatic performance, air-to-air combat, crosswinds, turbulence, and blind landing. The program offers training modes for each option and pilot skill rating for varying difficulty levels. In the LANDING PRACTICE, you'll use throttle control, flaps, and elevator control to adjust your rate of descent. Guidance can be taken either from the ILS, or the Flight Computer. In the Air-To-Air Combat PRACTICE, you'll use your radar and Flight Computer to obtain a readout of enemy bearing, range, and altitude. The enemy will not return fire in this mode during the dogfight. In NORMAL Air to Air Combat Mode, he will try to outmaneuver you, and of course will return fire. Use one or two joysticks & keyboard.
